

TIC TOCK

Trauma Informed Classrooms

Transformative Opportunities Changing Kids

**Trauma Informed Neurodevelopmental Practice
for Learning and Growing in the Classroom
Secondary School Years 7 - 10**

Timing is everything!

This training works with the strengths and the limitations of classroom teaching. Enables teachers to incorporate targeted routines to engage individuals to participate in group learning. Drawing on the Neurosequential Model of Therapeutics (NMT), a neurodevelopmentally - informed, biologically respectful perspective on human development and functioning, will help educators develop student behaviour and self-awareness that increases engagement and self- regulation.

The goals of NMT are to introduce teachers, school psychologists, counsellors and learning support staff to the foundations of neurosequential development and then to practice the application of this knowledge to the teaching and learning process. NMT is not a specific "intervention"; it is a way to understand brain development and developmental trauma and work with students inside and outside the classroom, particularly those students who have had adverse childhood experiences.

The training will provide information and practice examples to use with small and large groups. This form of targeted positive support can assist children and young people with learning, with their connection to others and will support teachers in the growth of their classroom 'ecology'.

Details

Presenter: Lisa Gardiner, Director, SAL Consulting Pty Ltd
Date(s): Monday, 13 November 2017
Time: 9am for 9:30am start to 4:30pm
Location: Learning InFusion, SAL Consulting, Level 1, Suite 1.05, 22-36 Mountain Street, Ultimo NSW 2007
